LONDON'S "CRONAGH"

Annual Irish Fair Biggest, Brightest Ever Held.

"ROLLED" BACON OF LIMERICK

Luscious - looking Irish Meat in Rows-Cheapness of Home-grown Wares-Every Branch of Peasant Industry Represented-Importance of Fair Centers Around Produce.

London, Oct. 12 .- Across the pleasant greensward of Vincent Square, Westminster, was to be seen throughout yes terday an emerald flag floating over the Royal Horticultural Hall and bearing upon it the counterfeit presentment of an Irish harp. Nearer at hand the skirling of the Irish pipes testified with further surety to the fact that within was in full progress London's annual "Cronach," or Irish fair, the biggest and brightest, alike socially and practically, ever yet held.

The "Cronach," originally started by the Gaelic League to help Irish industries, has this year for the first time enlisted the aid of the Irish Agricultural Department. It has become, to some extent, a state matter, and is more than ever an event of importance to every lover of Freland. Although the fair is to last till the end of the week, there were evidences even yesterday of the effect of this larger scope. Motors and carriages lined the curb, and there arrived quite an unwonted number of smart West End folk-for wealth and the brogue have not been very constant friends as yet!

None the less, the fair itself, though more crowded than ever, had the same old air of homely, kindly Irish gayety. Around the stalls were to be seen bevies of fair traffickers, fresh-come from Ireland, with soft Irish voices and faces that betrayed convincingly enough that "complexion of the lily and the rose" which, as Lord Dufferin said, "is to be found nowhere in the world save in Ire-

Band of Irish Nuns.

Here, characteristically enough, was to be seen a little band of Irish nuns. They had journeyed all the way from County Roscommon with carpets to sell, made by the hands of the actual peasant girls of the district. Quiet and timid though they seemed, these same nuns had of themselves turned an old manor house on Lord Dillon's estate into a prosperous farm, doing even the roughest work with their own hands. They had learned their craft of carpet-making in Belgium, and taught it to the Roscommon girls. And here were the actual carpets to bear witness to the result, wonderfully cheap and admirably made, and all charmingly designed in Irish patterns.

Hard by one might see dark-browed Spanish-looking boys from the south, guardians over piles of canned delicaeies-a new and splendidly progressive industry for Ireland—and rows of lusto point at Hoffmann, and broken down befell Prince Francis Joseph clous-looking Irish bacon. The old com- by this ghastly sight he confessed that he berg at Perugia last night. shop bacon, even at the orthodox glant strength. They got only \$400 as the Italian railways have redoubled the activ shilling a pound, need never trouble any one who has tasted the genuine "rolled"

Everywhere the cheapness of these burglary, sentenced to six years' imprislace-displayed by the and the death sentence was commuted to Tuscany and Umbria.

So it came about that when the prince, most delicate fingers to be found the world over—being soid for about a quarter of what would be paid in Regent street. Then there were woolen railway is only pretending madness.

So it came about that when the prince, in the company of two sporting friends, reached Perugia by a late train they were seized upon and their persons and street. Then there were woolen railway rugs-splendid ones for 12 shillings-and There was a remarkable scene when he luggage minutely searched. When, finally, shawls innumerable, all the work of the was confronted with Hoffmann. Blecha the prince succeeded in establishing his back by the three secretaries aforesaid shawls innumerable, all the work of the was controlled the prince succeeded in establishing in the prince succeeded in establi bog oak and other trinkets galore; Irish Pawlik, who later died in jail, was the up the more tweeds on every hand; and, not least, Irish furniture made from Irish timber at Navan-another new industry-and exhibited by the postmaster of that town out of sheer patriotism.

Yet another new Irish industry was to say that I am the murderer. be noted, too, namely, the manufacture picture post cards made of the peat from the famous Bog of Allan were in particular demand. To Amend Transvaal Constitution to End Blocking of Supplies. of brown paper out of peat. At one stall, largely to the affirmation of the Irish Autolycus that "sure it's a slice of the auld country I'm sellin' you."

Progress in Irish Farming.

Above all, however, the real importance of the fair centered round the magnifi- Louise of Belgium will shortly occupy the cent exhibit of butter, eggs, apples, fruit, attention of the Vienna and Paris courts. and farm produce generally, sent by the It is stated that the princess has run Irish agricultural department and ar- up debts of nearly \$1,000,000. She receives ranged by one of T. W. Russell's most \$10,000 a year from her father, King Leoenergetic officials. "You may know," said he yesterday, Philip of Coburg. Both have refused to prevent a recurrence of the blocking of

"that in the importation of eggs into this give her a penny more. country, Ireland is now second only to Russia. Our export in 1906 was over 1,000,000,000 eggs, representing some £3, 000,000. In the sale of Irish butter in Great Britain there has been an increase in the year of £162,000, and much the same has happened with poultry and bacon.

"But the great advance of the future." he continued, "is in the matter of fruit. There is no question about the Irish farmers being able to grow fruit-they could always do that. The difficulty has been in getting it to the market under proper conditions. Now that is where we can, and do, help them. We not only publish free leaflets giving exact instructions as to the all-important points packing and 'grading' or sorting for the English market, but our instructors go round and teach the farmers every detail of the business, while we do all in our power to facilitate transit. The result is that this very year the best Irish apples were sold in Covent Garden at 4s a dozen.

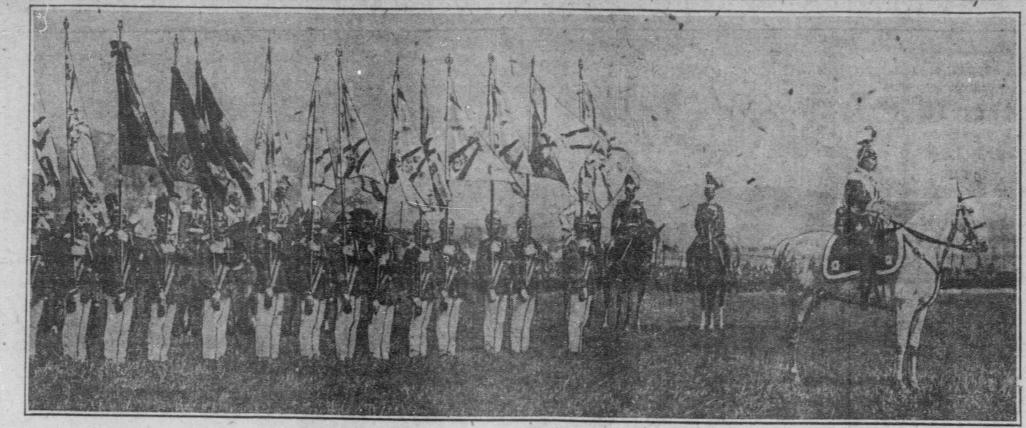

Then we do all we can to encourage hy-products and the canning of such fruit as is not sent fresh to the market. This has been enormously successful, too. Our Irish canned fruit is already showing its superiority to the continental import, largely because, under our instructions, the proper cooking varieties chosen, and not merely the surplus of the eating varieties."

It need hardly be said that all these encomiums were fully borne out by the display of Irish fruit and poultry, and received in Vienna: "I fear my daughthe rest of it, upon the department's ter Louise will some day die of hunger benches at the Herticultural Hall yes-Another Irish industry admirably exemplified there was that of the growth and manufacture of tobacco, for which the Irish climate appears peculiarly its normal value, and her jewelry and through a gallery, Henri noticed a form

AMERICANS UPON E NGLISHMAN'S GRAVE,

Rear Admiral Very, United States naval commandant at Honolulu, has recently sent the naval tug lroquois to Kealakekua Bay, in the island of Hawaii, distance of seventeen miles, for the special purpose of renovating the monument erected in that place to the memory of Capt. Cook, R. N., the great English circumnavigator of the globe. All the undergrowth in the inclosure was cut down, the monument repaired, the lettering of the inscription reblackened, and the cannon and chains surrounding it repainted by the blue-jackets of the Iroquois, under the direction of Lieut. Commander Carter, U. S. N. Formerly the monument was kept in order by crews of British men-of-war which visited the spot from time to time for the purpose; since annexation of the Hawaiian Islands, however, the United States navy has undertaken the task. Capt. Cook met his death in 1779 at the hands of a native chief named Nooah. The fight arose owing to the stealing of a ship's boat by the natives. Capt. Cook endeavored to remove the King on board in order to hold him as a fostage, when he was struck down from behind.
